PROFESSIONAL SUMMARY

Full-stack Software Engineer with 3+ years of experience in banking operations and enterprise application support at Amana Bank PLC. Currently maintaining Internet Banking and OMNI platforms serving over 100,000 active users, with hands-on responsibilities spanning production support, SQL diagnostics, root cause analysis, and cross-team defect resolution. Proficient in ASP.NET Core MVC, C#, Entity Framework Core, React.js, SQL Server, and PL/SQL. Demonstrated ability to design and deliver full-stack web applications across financial, educational, and AI-powered domains. Graduating in 2026 and seeking a Software Engineer role to combine domain expertise with modern development practices.

KEY ACHIEVEMENTS

- Supported Internet Banking & OMNI platforms with 100,000+ active users, maintaining high availability and minimizing production incidents.
- Built a trust score-based worker recommendation engine with NLP-powered natural language search, shortlisting relevant workers from loosely described job requests.
- Developed an AI banking chatbot using RAG, FAISS vector search, and Sentence Transformers, reducing repetitive support queries through automated intelligent responses.
- Contributed to digital process improvements at Amana Bank that reduced document processing times and improved operational efficiency across branch operations.
- Built and deployed a personal portfolio website achieving mobile-responsive performance across all device sizes via Netlify.

PROFESSIONAL EXPERIENCE

Executive Associate – Application Support | Amana Bank PLC | Oct 2025 – Present

- Provide production support for Internet Banking and OMNI platforms serving 100,000+ active users, ensuring platform uptime and uninterrupted business operations.
- Investigate and resolve application, database, and system integration incidents through structured root cause analysis, reducing average resolution time.
- Execute SQL and PL/SQL queries for data validation, issue diagnosis, and operational reporting across enterprise banking databases.
- Collaborate with software development teams on defect resolution, regression testing, and release deployments for new features and patches.
- Built and maintained a technical knowledge base of support articles, reducing repeat escalations and improving first-response resolution rates.
- Monitor system performance metrics and contribute to maintaining SLA-compliant platform availability.

Junior Banking Assistant | Amana Bank PLC | 2024 – 2025

- Managed day-to-day operational workflows across branch banking systems, ensuring compliance with internal procedures and regulatory requirements.
- Supported digital transformation initiatives that streamlined document workflows, improving processing efficiency across departments.
- Maintained accurate financial records and performed data validation using enterprise core banking platforms.
- Coordinated with multiple teams to ensure timely resolution of operational issues and transaction processing queries.

Banking Assistant | Amana Bank PLC | 2022 – 2024

- Processed retail and SME financing applications with strict adherence to data accuracy, documentation standards, and compliance requirements.
- Operated enterprise banking systems for end-to-end management of customer records, transactions, and facility requests.
- Analyzed financial documents and customer records to support credit and operational decision-making processes.
- Collaborated with branch teams to improve service delivery standards and reduce processing turnaround times.

PROJECTS

Banking Assistant – AI Banking Support Chatbot — Python | Flask | SQLite | NLP | RAG | FAISS | Sentence

Transformers

- Designed and developed an AI-powered banking chatbot combining NLP, Retrieval-Augmented Generation (RAG), and semantic search to deliver intelligent, context-aware support responses.
- Implemented intent detection, banking term normalization, and spelling correction to handle unstructured user queries effectively.
- Integrated FAISS vector search with Sentence Transformers to enable high-accuracy semantic knowledge retrieval from a curated banking knowledge base.
- Built an administrator-facing training interface backed by SQLite, allowing new question-answer pairs to be added without code changes.
- Applied a three-tier architecture ensuring scalability and clean separation of concerns across presentation, logic, and data layers.

Skill Link – Skilled Worker Recommendation Platform — ASP.NET Core MVC | Entity Framework Core | SQL Server |

Bootstrap

- Built a full-stack platform that connects customers with skilled workers via a trust score-based recommendation engine, ranking workers by reliability, experience, and service history.
- Implemented natural language search allowing users to submit requests such as 'I have a water leakage in Colombo' and receive accurate worker matches.
- Delivered role-based authentication for Customers, Workers, and Administrators with secure session management.
- Built an admin dashboard for managing users, services, recommendations, and platform analytics.
- Live Demo: [skilllink](#) | GitHub: github.com/shazandev404/SkillLink-Skill-Worker-Platform

UniManage – University Management System — ASP.NET Core MVC | Entity Framework Core | SQL Server | Bootstrap

- Developed a comprehensive university management system for managing students, courses, departments, and academic operations.
- Implemented CRUD modules for student, course, and faculty management with dependency injection and MVC patterns for maintainability.
- Designed relational database schemas in SQL Server using Entity Framework Core with migrations and code-first modelling.
- Built responsive UI with Bootstrap and Razor Views, with role-based authentication and secure access control.

Personal Portfolio Website — HTML | CSS | JavaScript | Netlify

- Designed and developed a fully responsive portfolio website showcasing projects, skills, and professional experience.
- Optimized performance and responsiveness across desktop and mobile breakpoints; deployed via Netlify with continuous delivery.
- Live Demo: [SHAZAN.DEV](#) | GitHub: github.com/shazandev404/MyPortfolio

TECHNICAL SKILLS

Languages	C#, JavaScript, PHP, Python, SQL, PL/SQL, HTML5, CSS3
Frontend	React.js, Bootstrap, Responsive Design, Figma, Adobe XD
Backend	ASP.NET Core MVC, Entity Framework Core, Laravel, REST APIs, Flask
Databases	SQL Server, MySQL, MongoDB, PostgreSQL, SQLite, Supabase
Tools	Git, GitHub, Visual Studio, VS Code, Postman, Cursor
Cloud	Netlify, GitHub Pages
Methods	OOP, MVC Architecture, Agile, SDLC, Database Design, API Integration, UI/UX Design

EDUCATION

BSc (Hons) in Software Engineering | London Metropolitan University

Expected Graduation: 2026

Higher National Diploma (HND) in Computing | ESOF Metro Campus

2022 – 2024

Diploma in Information Communication Technology | ESOF Metro Campus

2018 – 2019

CERTIFICATIONS

- Python for Beginners – University of Moratuwa (2025)
- Web Design for Beginners – University of Moratuwa (2025)

LANGUAGES

- English – Professional Working Proficiency
- Tamil – Native
- Sinhala – Native
